

Omar Farahan Molla *Senior Test Engineer*

 omrfrhn@gmail.com  9547508846  Kolkata, India  [LinkedIn](#)  github.com/Kingfrhn

Profile

Senior QA Test Engineer with 4+ years of experience in game and application testing across mobile, console, web, and PC platforms. Skilled in functional, regression, exploratory, and cross-platform testing, defect lifecycle management, and STLC. Familiar with API testing concepts, REST/SOAP web services, Selenium WebDriver, and Core Java.

Skills

Core QA Skills

Functional Testing • Regression Testing • Exploratory Testing • Smoke Testing • Sanity Testing • UI/UX Testing • Test Case Design • Bug Reporting & Documentation • Cross-Platform Validation • Live-Ops Testing

Automation & QA Tools

Selenium WebDriver (Basic) • FireFlink (Codeless Automation) • API Testing Concepts (REST, SOAP, JSON, HTTP Methods) • Postman (Learning)

Methodologies

Agile (Scrum) • STLC • SDLC

Tools & Debugging

Jira • TestRail • ADB • Logcat • Charles Proxy • Slack • 3U Tool • A/B Testing Admin Tools • Android Studio • Crash Log Analysis

Platforms

Android • iOS • Windows • PS4 • PS5 • Xbox • Nintendo Switch • HTML5 / Web

Professional Experience

08/2022 – Present Senior Test Engineer, [GlobalStep Services Private Limited](#) 
Pune, India

- Led a team of 5-8 testers during multi-platform testing cycles, improving task allocation and execution efficiency.
- Executed 200+ functional and regression test cases per sprint, ensuring feature stability before release.
- Logged and tracked 150+ defects per release cycle in Jira, providing detailed reproduction steps, logs, and screenshots.
- Performed cross-platform validation across Android, iOS, Windows, macOS, and console platforms.
- Analyzed issues and assisted developers with root cause identification during defect validation.
- Utilized ADB, Logcat, and Charles Proxy to investigate crashes, network issues, and gameplay defects.
- Conducted knowledge transfer sessions for new testers, improving onboarding and testing consistency.
- Coordinated with developers, QA leads, and producers via Slack to align testing priorities and release validation.
- Participated in live-ops release validation and gameplay sessions to ensure build stability before release.

08/2021 – 08/2022 Test Engineer, [GlobalStep Services Private Limited](#) 
Pune, India

- Performed functional, exploratory, and regression testing across mobile, console, and web game titles.
- Identified edge-case gameplay issues and UI defects, improving product stability during development cycles.
- Created and maintained test cases and bug reports in Jira and TestRail.
- Evaluated feature requirements for testability and risk areas, providing QA feedback during development.
- Collaborated with QA leads and developers to reproduce, validate, and close defects efficiently.

Projects

- 01/2023 – Present** **King - Mobile Live-Ops Game**, *Platforms: Android, iOS, Windows, HTML5*
- Validated live events, feature releases, and A/B experiments during live-ops updates.
 - Executed regression, functional, exploratory and cross-platform testing during weekly content updates.
 - Coordinated with client teams for bug verification and release readiness.
- 07/2022 – 12/2022** **Scopely – Mobile Game**, *Platforms: Android, iOS, Windows*
- Performed feature validation and regression testing during development cycles.
 - Reported gameplay, UI and functional issues using Jira.
- 01/2022 – 07/2022** **Bandai Namco – Console Game**, *Platforms: PS4, PS5, Xbox, Nintendo Switch, Windows*
- Tested gameplay mechanics and platform-specific features across console environments.
 - Reported gameplay, UI and functional issues using Jira.
 - Verified bug fixes during regression cycles before milestone builds.
- 10/2021 – 01/2022** **Microids - Console Title**, *Platforms: PS4, PS5, Xbox, Nintendo Switch, Windows*
- Conducted feature testing and issue validation during gameplay sessions.
 - Reported gameplay, UI and functional issues using Jira.
- 09/2021 – 10/2021** **Eidos Montreal – Console Title**, *Platforms: PS4, PS5, Xbox, Windows*
- Executed functional and regression testing across console platforms.

Key Achievements

- Mentored 10+ QA testers through knowledge transfer sessions and gameplay training.
- Contributed to multiple successful game releases by ensuring stable builds during regression cycles.
- Improved defect documentation standards, helping developers reproduce issues faster.

Professional Training

- 11/2024 – 02/2026**
Kolkata, India **Software Testing with Java Automation (SDET)**, *QSpiders*
- Core Java fundamentals
 - Selenium WebDriver (Basic & Advanced)
 - Automation framework concepts
 - Mobile and Web automation using FireFlink (Codeless Automation Tool)

Education

- 09/2018 – 08/2021**
Burdwan, West Bengal, India **Bachelor of Engineering (B.E)**, *University Institute of Technology*
- 08/2015 – 06/2018**
Midnapore, West Bengal, India **Diploma**, *RRK Government Polytechnic*
